## SAT

Created in 1926 by the US College Board as an university admission test.<sup>1</sup>

## Overall Performance in Minnesota

**Year 2017** : Among the highest average scoring state with score of **1295**.  
**Year 2018**: Increase in average score to **1298**.  
**Common factor**: Low participation rate ranging from **3% to 4%**.

## Task

As members of the College Board in charge of the Northern states, we have been tasked to make recommendations for the improvement of SAT participation rates.

## PROBLEM STATEMENT

How the College Board might work to increase the SAT participation rate in Minnesota based on 2017 & 2018 data?

1. Source: <https://en.wikipedia.org/wiki/SAT>

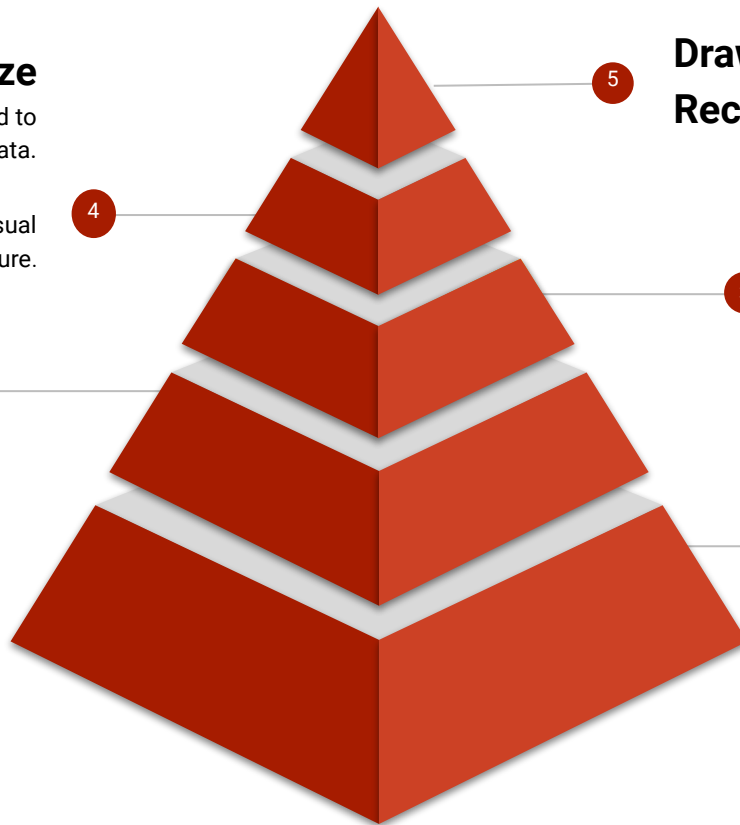

# Procedural Pyramid

## Analyze and Visualize

Perform analysis techniques that lead to draw conclusions from polished data.

Leverage preattentive attributes in visual perception to get the bigger picture.

## Combing/Error Checking

## Draw Conclusions & Recommendations

## Modify Data

Produce 'tidy', analysis-ready datasets to ensure analysis is error free.

## Download Raw Data

# Visualization

Minnesota tops the SAT cohort in 2017 & 2018

Composite ACT vs Total SAT scores 2017 & 2018

# Visualization

However, SAT participation in Minnesota is lacking

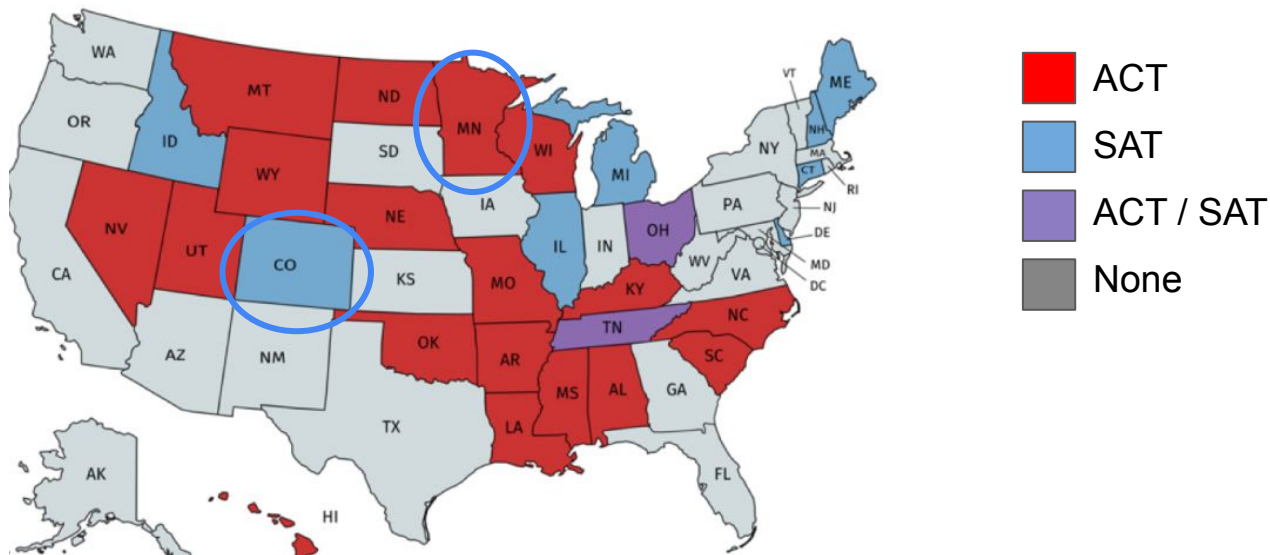

# Visualization

## Map of states which require ACT / SAT

# Visualization

## Map of states which have School Day testing

# Case Study: Colorado

Colorado managed to drastically improve SAT participation

- SAT was mandatory in 2018
- Full sponsorship for SAT

# Case Study: Colorado

Unintended Cost: Colorado SAT average scores dropped with increased participation.

From an average SAT test score of 1200 in 2017 it dropped to 1050 in 2018.

# Conclusion

2017 and 2018, the state of Minnesota had one of the lowest participation rates at 3% - 4 %. To help improve the participation rates, We looked at the state of Colorado because they were able to increase the participation rate by over 700% within a year.

Some recommendation we have from researching what Colorado did:

- A. Make SAT mandatory
- B. Enable School Day testing
- C. Sponsor test fees

To mitigate the by product of the drop average SAT test scores we suggest that the state could implement these ideas at the same time:

- A. Improve student's access to study materials
- B. Impose a fee for retests, as a negative reinforcement
